**UCL Adult ALL MRD Laboratory**

Price List, August 1 2010

Individual elements of Adult ALL MRD screening

Sample processing;  
(Blast cell isolation, DNA/RNA extraction and nucleic acid storage necessary for future testing)

£200

Patient specific Ig/TCR rearrangement detection;  
(initial PCR screening/heteroduplex gel analysis/sequencing/  
patient specific oligonucleotide design & ordering/testing  
of patient specific oligonucleotides)

£1500

Follow-up Ig/TCR re-arrangement quantification  
by RQ-PCR

£350

BCR-ABL p190 quantification by RQ-PCR

£200

UKALL14 package

£3200

Includes all elements of MRD testing for the duration of the  
protocol – at least 4 follow ups can be processed.  
Ig/TCR will be carried in out in parallel to p190 quantification  
where relevant
