Subject: UKALL14 SUSAR line listing for period: 11 Dec 2014 – 31 Mar 2015

Dear UKALL14 Investigators

As trial sponsor we are required to provide quarterly updates to PIs regarding the occurrence of SUSARs within trials.

No SUSARs have been reported to UCL CTC for the UKALL14 trial for the following time period:

- **11 Dec 2014 – 31 Mar 2015 : 3 reported SUSARs.**

Site	Patient ID (e.g. 14-1-001)	SAE ID (e.g. 14-1-001-01-2)	Trial Arm	Name of Event	Status	Date of Report	Date received @ CTC
University Hospital Aintree	14-1-196	14-1-196-01	B2	Thromboembolic event	resolved	01/07/2013	01/07/2013

Freeman Hospital	14-1-039	14-1-039-01*	B2	Visceral Arterial Ischemia	resolved	14/11/2011	14/11/2011
Royal Devon & Exeter Hospital	14-1-346	14-1-346-01-02	B2	Stroke	resolved	12/02/15	12/02/15

**TMG discussions wanted SAE reported as a SUSAR due to limited literature on event and non-specific details in the SPC. QC check could not locate evidence of submission as a SUSAR to MHRA/REC, therefore submitted.*

Please contact me if you have any questions.

Kind regards

Emma
